

Technology Without Boundaries: On Telecommunications in a Global Age, Harvard University Press, 1990.

Ithiel de Sola Pool

Edited by Eli M. Noam

Contents

PART I COMMUNICATIONS AND THE CHANGING ENVIRONMENT

1. From Mass Media Revolution to Electronic Revolution	3
<i>The Example of the Printing Press</i>	3
<i>The Era of Digital Communication</i>	7
<i>Information and the Second Industrial Revolution</i>	10
<i>The Consequences</i>	13
2. The New Communications Technologies	19
<i>Defining a Communication System</i>	19
<i>Digital versus Analog Signals</i>	20
<i>Transmission Media</i>	23
<i>Spectrum</i>	28
<i>Satellites</i>	29
<i>Computer Message Processing</i>	32
3. Crumbling Walls of Distance	34
<i>Instantaneous Communication</i>	35
<i>Wireless Transmission</i>	37
4. Limits to Growth	40
<i>Spectrum: A Finite Resource?</i>	40
<i>Programming</i>	48
5. Talking and Thinking among People and Machines	50
<i>The Concept of Computer</i>	50
<i>Computers and Communication</i>	56
<i>Interactive and Individualized Communication</i>	59

PART II SATELLITES, COMPUTERS, AND GLOBAL RELATIONS

6. Communities without Boundaries	65
<i>The Spatial Reorganization of Activity</i>	67
<i>The Global Flow of Mass Media</i>	71
<i>Person-to-Person Networks</i>	83
<i>International Information Retrieval Systems</i>	88

7. Regulating International Communication	101
<i>Restrictions on Free Flow</i>	101
<i>The Protectionist Case</i>	109
<i>Charges of Cultural Imperialism from the Left and Right</i>	121
<i>Why American Television Succeeds Abroad</i>	126
<i>The Fallacies of Protection</i>	129
<i>The Diffusion of Centers of Activity</i>	137
<i>The Theory of Comparative Advantage</i>	144
8. Broadcasting from Satellites to Home Receivers: A Case Study	149
<i>Direct versus Redistribution Broadcasting</i>	153
<i>Frequencies and Orbital Locations</i>	155
<i>Cooperative versus Unwanted Broadcasts</i>	161
<i>The American, Soviet, and Third-World Positions</i>	163
9. Communications for the Less Developed Countries	167
<i>Do Poor Countries Need State-of-the-Art Technology?</i>	170
<i>A Four-Media Communications System</i>	178
<i>“Development Communication” versus Infrastructure</i>	180
<i>Organizing at the Grass Roots</i>	189
<i>Development is Two-Way Communication</i>	193
<i>Managing the Communications Resource</i>	195
<i>Fostering Development in an Electronic Age</i>	201
10. Advanced Communications and World Leadership	205
<i>Telecommunications and the Projection of National Power</i>	205
<i>Export of Telecommunications Hardware</i>	207
<i>Facilitation of World Trade</i>	208
<i>Trade in Knowledge</i>	209
<i>International Pressures on Communications Policies</i>	209
<i>The American Role</i>	214

PART III ECOLOGY, CULTURE, AND COMMUNICATIONS TECHNOLOGY

11. The Ecological Impact of Telecommunications	219
<i>Communication and the Patter of Urban Settlement</i>	220
<i>The Communications/Transportation Tradeoff</i>	224
<i>Megalopolis</i>	229
<i>Communications, an Abundant Resource</i>	236
12. Technology and Culture	239
<i>Interaction and Diversity</i>	240
<i>The Future of the Book</i>	248
<i>Copyright</i>	254
<i>Some Recapitulations</i>	259
